Assignment 6 (given by Zoran Obradovic)

No. of Problems: One
Due: March 22 in class.

Problem 1: (50 points)
Write a research proposal for the CIS 526 class project that you plan to perform. Use the following format:

• Title and author;
• Objective and Significance (outline learning problem);
• Background (summarize related work by others);
• Proposed Approach (describe available data, learning method you plan to use, how you plan to test and compare to alternative methods);
• Provide approximate timeline of the proposed work.
• References.

The description may not exceed 3 pages in 12 pt style.
Note: Please write your e-mail address on page one to allow prompt feedback.
After I approve the topic prepare short (3 minutes) PowerPoint presentation summarizing your project proposal. You will present this in class on March 29.
